12 INDUSTRY COURSES

IDN-CHICAGO TRADE SHOW / 10.16.26

REGISTER NOW

Class # 4 - NGP Fire Door Inspection & Remediation Class

TIME: 9:00 a.m. - 12:00 p.m.
TRAINER: Hal Kelton

This intermediate-to-advanced training program is designed for door and hardware distributors, installers, inspectors, facility managers, and code officials who want to understand practical processes for identifying and correcting common fire door deficiencies without unnecessary door or frame replacement. Participants will learn how to identify excessive clearance issues and other common deficiencies found during fire door inspections, understand the applicable requirements of NFPA 80, IBC, IFC, and UL listings, and properly select and install listed remediation products.

Class # 5 - HPC Blitz: Advanced Tips & Techniques. Unlocking the full potential of the HPC Blitz Key Machine

TIME: 9:00 a.m. - 12:00 p.m.
TRAINER: Marty Jalove

This hands-on class goes beyond the instruction manual, revealing expert locksmith tips and tricks developed in the field. While cutting by code is a central feature, the HPC Blitz offers much more. Learn how to extend its capabilities, troubleshoot common issues, and maintain your machine like a pro.

HPC Blitz Overview

- HPC Blitz vs. 1200CM: Key differences and performance comparison
- Blitz vs. Computerized Code Machines: Cost, ease of use, and application

Key Cutting & Decoding Techniques

- Cutting by Code: Best practices for accuracy
- Decoding Existing Keys: Using the machine for analysis
- Cutting Double-Sided Keys: Techniques for precision
- Cutting Tubular Keys: Setup and method
- Cutting Medeco Keys: Specialized steps
- Easy Impressioning with the Blitz: Time-saving strategies

Calibration & Setup

- Calibrating the Machine: Maintaining cutting accuracy
- Tip vs. Shoulder Gauges: Choosing the right alignment tool
- Replacing a Broken Shoulder Gauge
- Card Organization Issues: Solutions for managing your cards
- Using Key Adaptors vs. Jaws: Efficiency and accuracy tips

Cards & Software

- Micrometer Cards: What they are and how to use them effectively
- Software Tools: Designing and printing custom cards

Maintenance & Troubleshooting

- Jaws and Cutters: Overview of types and use cases
- Troubleshooting Common Problems: Field-tested solutions
- DIY Repairs vs. Sending It In: Knowing your limits and when to get help

Class # 6 - BEST Interchangeable Core Combining Workshop

TIME: 9:00 a.m. - 12:00 p.m.
TRAINER: Jon Hunt
MAXIMUM: 20 ATTENDEES

This is a field instructor led class to familiarize the student with IC Cores, pinning and maintaining BEST Key Systems Cylinders and Cores.

Upon completion this course you will be able to:

- Identify BEST Key System, Codes & Cores
- Understand options available on Master Key Hierarchy and expansion options
- Explain the use of a Key Combinator, Pinning Cores, and CoreMax
- Troubleshoot common Key System & Core issues that can develop over time

IDN-CHICAGO TRADE SHOW / 10.16.26

REGISTER NOW

Class # 7 - **LSDA Training Class/Taking your business to the next level for Locksmiths**

TIME: 1:00 p.m. - 3:00 p.m.
TRAINER: Jason Patterson

LSDA

Designed for Locksmiths, this course provides a comprehensive overview of the LSDA product line. Gain valuable insights to drive your business forward. The class will focus on how LSDA can help you grow your business, proper installation techniques and best practices with the help of new product demonstration.

Topics covered will be:

- History of LSDA
- Complete product line overview
- Product demonstration & introduction of new products:
 - NEW! Padlocks
 - NEW! 5000 Series Privacy Function with Indicator Lock
- Product tips
- Benefits of buying LSDA and how it can contribute to your profit growth.

Class # 8 - **Preparing for Fire Door Inspections with Allegion**

TIME: 1:00 p.m. - 4:00 p.m.
TRAINER: To be announced

ALLEGION

Upon completion this course you will be able to understand:

- Purpose of fire door assemblies
- Terms related to fire door assemblies
- Importance of maintaining fire door assemblies
- NFPA 80 introduction
- NFPA 80 Chapter 5 inspection, testing, and maintenance
- NFPA 80 Chapter 5 quiz
- Identifying NFPA 80 violations
- Your fire door assembly inspection program
- Review

Class # 9 - **Ilco & Advanced Diagnostics Intermediate Automotive Key Programming**

TIME: 1:00 p.m. - 4:00 p.m.
EXPERIENCE: *Should have 6 months or more experience in automotive key programming.*

TRAINER: Travis Howell
MAXIMUM: 15 ATTENDEES

Attendees will walk through real-world programming scenarios across major vehicle platforms, review current bypass methods, and see hands-on demonstrations of Ilco and Advanced Diagnostics tools in action. The class blends technical instruction with live demos and open discussion to help technicians understand additional programming methods on vehicle security systems.

- Programming with bypass methods for Dodge, Jeep, Chrysler, Toyota, Nissan, and VW.
- When and how to use key emulators for Ford, Toyota, and Subaru.
- PullingPin Codes on newer Hyundai, Kia vehicles
- MYKEYsPro overview and demonstrations to know when you'll need to use bypass or emulator tools
- Transponder Key Cloning with Smart Arial and GTI Pro Chips
- Hands-on Vehicle Programming Demo focusing on latest development.
- Opendiscussion

Class # 10 - Today's Trends and Best Practices for Securing Education Facilities

TIME: 1:00 p.m. - 4:00 p.m.
TRAINER: Guy Grace

School Directors,
Superintendents,
Board Members

ASSA ABLOY

This session provides a practical, governance-first look at today's most relevant trends and leading practices in school security, grounded in the frameworks and field experience of the *Partner Alliance for Safer Schools (PASS)* and the practitioner leadership of the *National Council of School Security Directors (NCSSD)*.

Participants will explore how effective school security programs align policy, people, facilities, and technology into a layered approach that reduces risk without disrupting the educational mission. Drawing on real incidents, lessons learned, and nationally recognized best practices, this presentation focuses on what works in real school environments and why well-intended security investments often fail when governance, training, and system integration are overlooked.

- The current K-12 threat and risk landscape
- Governance, policy, roles, and accountability as the foundation of defensible school security
- Layered security in occupied school buildings (PASS-aligned concepts)
- Doors, openings, locking, access control, life safety hardware, communication systems, and responder access considerations
- Detection, supervision, monitoring, and coordinated response during daily operations and emergencies
- Integration challenges and lessons learned from real incidents shared across the NCSSD practitioner community

Class # 11 - Access Control Made Easy with INOX

TIME: 1:00 p.m. - 4:00 p.m.
TRAINER: Russ Anderson

This course begins with an overview of the site survey of an opening to determine what you should consider – including codes, fire rating, frame type and door type. The type of lock operation and how the door should function under certain conditions. The focus is choosing the most correct solution based on customer expectations, opening conditions and function as well as budget.

- Identify any underlining factors that may cause an opening not to function properly.
- How to identify customer expectations when choosing a solution.
- Identify how to match the proper solution with the opening
- Summarize how certain codes can impact solution selection
- Take in consideration customer budgetary restraints when choosing a solution.
- Hands on application of budget friendly solutions

Class # 12 - dormakaba Electric Strike Hardware Options, Installation Do's & Don'ts

TIME: 1:00 p.m. - 4:00 p.m.
TRAINER: Jon Hunt

MAXIMUM: 15 ATTENDEES

Individuals responsible for
servicing and maintaining
hardware within facilities

dormakaba

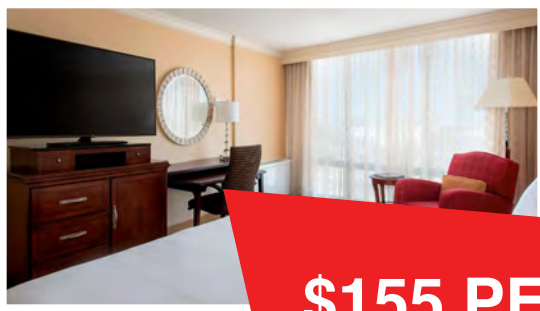

This is a 3 hour in the field instructor led electric strike overview that will help participants to understand electric strike basics, door frames, codes and listings. We will discuss installation of a strike and then perform actual cut-in on a metal frame, after the presentation.

Upon completion of this course you will be able to:

- Specify a Strike
- Understand Lockset Types
- Job Preparation-Site Assessment
- Recommend options for code compliant applications and use
