

**TRIDENT PARTS LIST****TRIDENT FIELD SERVICE PARTS & ELEMENTS****LOCK BODY AND MODULES****Trident Field Replacement Assembly (TFRA)****Usage:**

Damaged modules, cables or multiple issues

Information:

The Trident is furnished with the modules factory installed to ensure proper function when installed according to the steel template furnished with each Trident and proper mounting of the strike and drilling on the frame holes.

TFRA allows door self and manual locking Trident replacements with retention and reuse of the existing paddle, strike, channels, module covers, anti-pry plate (or other exterior trim), hinge-side bolt(s) and fasteners.

TFRA Repair Program:

Removed Trident assemblies can be returned to Securitech for review and repair. A repair evaluation will be performed and an estimate provided prior to any work. Return units can be used for future service, if needed.

PN: **10152701**

(Self-Locking)

PN: **10152702**

(Manual Locking)

Paddles

TEL-PBAG-EV1 : 12" Standard Paddle

TEL-PBAG-EV1-RSEG: 12" Rubber Strap Paddle

Contact Securitech for longer paddles

Self-Locking Trigger

PL-065 : Replacement trigger replaces worn-out or damaged trigger.

Paddle Arm

10029701 : Paddle arm with pin assembly

Additional Parts

TEL-A-APP-1 : Anti-pry plate

TEL-HSB1 : Additional Hinge Side Bolt for Extra Locking Points

TEL-A-SP-1 : Strike for the center deadbolt with fasteners

LOCK BODY AND MODULES**Trident Field Replacement Mechanism (TFRM)****Usage:**

Damaged self-locking lock mechanism only

Information:

A qualified technician can remove the cable connection and reinstall them to the new lock mechanism, which is prepared for this service work. TFRM allows for retention of all elements while replacing the primary lock mechanism. Please note the lock body is never shipped individually and disassembling of the full assembly and replacement of an individual item is not an option.
